DIRECT
STEEL SOLUTIONS

CAPABILITY
STATEMENT

Structural steel. Seamless delivery.

Engineering coordination, supply, fabrication and installation. Backed by Direct Cranes.

ONE PARTNER. FROM DRAWINGS TO INSTALLATION.

MELBOURNE / REGIONAL VICTORIA / AUSTRALIA-WIDE SUPPORT

01 / THE DIRECT APPROACH

One partner. Every stage.

Direct Steel Solutions brings the steel package together, from engineering coordination and procurement through to fabrication, delivery and installation.

We coordinate the detail, the supply chain and the site sequence through one point of contact. Direct Cranes supports the lifting, transport and rigging requirements from the planning stage.

AUSPRO STEEL PTY LTD

STEEL SUPPLY PARTNER

Steel procurement aligned with the drawings, project program and delivery requirements.

SECTORS WE SUPPORT

- Commercial construction
- Industrial
- Residential construction
- Warehousing & logistics
- Manufacturing
- Government & councils
- Infrastructure
- Healthcare
- Education
- Retail
- Telecommunications
- Sports & recreation

02 / COMPLETE STEEL SERVICES

From first drawing to final placement.

A coordinated service across the full structural steel package.

01

Engineering & detailing

Engineering coordination, connection design support, shop drawings and steel detailing to prepare the package for fabrication.

02

Steel procurement

Structural sections, plate and connection materials sourced through Auspro Steel Pty Ltd and approved suppliers.

03

Fabrication & finishes

CNC plate processing, cutting, drilling, punching, welding and assembly, with trial fit, quality checks and surface treatment coordination.

04

Delivery & logistics

Transport and delivery sequencing aligned with site access, handling requirements and the installation program.

05

Cranes & rigging

Lift planning and crane coordination supported by Direct Cranes, with riggers and dogmen for controlled placement.

06

Structural installation

Steel erection, alignment, connection and completion support, coordinated with the builder and the site team.

03 / A CLEAR PATH TO COMPLETION

Built around your program.

Scope, detail, fabrication and site works are coordinated as one sequence.

01 Review

Confirm the scope, drawings, access and construction program.

02 Engineer

Coordinate calculations, connections and certification requirements.

03 Detail

Prepare shop drawings, modelling and fabrication information.

04 Procure

Coordinate structural steel and connection materials through suppliers.

05 Fabricate

Cut, drill, weld and assemble, with inspections and finish coordination.

06 Deliver

Plan transport, site arrival and steel sequencing for the installation.

07 Install

Coordinate crane lifts, rigging, steel erection and alignment.

08 Handover

Coordinate completion records, QA and required engineering sign-off.

CLEAR SCOPE. COORDINATED DELIVERY.

04 / BACKED BY DIRECT CRANES

The lift is part of the plan.

Lifting, transport and rigging are considered alongside the steel package, bringing site access and installation sequencing into the project early.

LIFTING CAPABILITY

Mobile, Franna and slew cranes, supported by licensed riggers and dogmen for steel placement and erection.

SITE COORDINATION

Crane access, lift planning, transport and delivery sequencing coordinated with the steel installation program.

Direct Steel Solutions coordinates your steel package.
Direct Cranes supports the lifting and logistics.

05 / PLANNED. CHECKED. DOCUMENTED.

Detail matters. On site. On record.

Safety and quality are planned alongside the steel package, with the documentation and site controls aligned to project requirements.

01 Site & lift planning

SWMS, Job Safety Analysis, site inductions, lift studies and crane lift plans.

02 Fabrication controls

Material traceability, weld procedures, qualifications, inspections and fabrication records.

03 Installation checks

Licensed riggers and dogmen, controlled placement and alignment checks.

04 Completion records

Quality documentation, required engineering certification and final handover records.

06 / STEEL IN CONTEXT

Made for the site.

Structural framing, crane-assisted installation and commercial fitout.

01 / STRUCTURAL SUPPORT

Steel framing within the building structure.

02 / FRAME INTEGRATION

Structural steel at the timber interface.

03 / CRANE-ASSISTED INSTALL

Steel placement within the site sequence.

04 / COMMERCIAL FITOUT

Exposed structure in a finished interior.
